

retreat to culture & comfort

A visit to Bali would be incomplete without experiencing the Balinese culture and the island's natural beauty. Ideally situated high up on the edge of the green Ayung River valley in Bali's central foothills, lies a secluded hillside retreat where culture and comfort collide with nature as Balinese temples, rituals and dancing forms part of the daily routine while monkey troops swing through the trees and guests enjoy relaxed luxury living.

Alila Ubud's design has been landscaped

to resemble a Balinese hillside village complete with its own community centre and pedestrian lanes. The resort's rooms and villas are set into the banks of the river valley above a ravine on stilts like tree houses. The world-renowned architectural firm Kerry Hill Architects has adapted traditional Balinese design into a modern geometry combining smooth plaster or concrete walls with thatched roofs, terrazzo tiles with gravel or crushed rock and wood with glass, creating one of the most intimately designed boutique hotels in the world.

The accommodation on offer includes: The 65 sqm Deluxe Rooms located on the ground floor, featuring individual garden terraces and a back courtyard with an

RETREAT TO CULTURE AND COMFORT

CLOCKWISE FROM LEFT

- The Terrace tree Villa's perched in the ravine
- Unwind at the spa
- The semi outdoor bathrooms brings nature and relaxation together in complete harmony
- Freshly prepared drinks from the Cabana Lounge
- The interior of all the rooms and villas perfectly compliments the naturally beautiful exterior
- Balinese food from the buffet

open-air bathroom and shower surrounded by refreshing valley views. The 75 sqm Valley Villas perched over the Ayung River. The 120 sqm Pool Villas that offer an indulgence of space and seclusion in beautiful landscaped gardens with a large private swimming pool, and an open-air bathtub set in the middle of a lotus pond. And lastly the lofty 120 sqm Terrace Tree Villas with spacious wood-decked terraces surrounded by soothing views of lush plantations and rice paddies on the banks of the valley.

To unwind the resort delivers world-class Spa treatments, relaxation at their award winning infinity pool with delectable service and menu from the Cabana Lounge and a leisure concierge that can arrange various sightseeing tours. Discover the surrounding area with trips to Kintamani, the spectacular rice terraces at Tegalalang, the natural springs at Tampaksiring, Ubud's galleries, museums and souvenir shops, and the village of Petulu, home to a large flock of white egrets or the Goa Gajah Elephant Cave.

The Plantation Restaurant's culinary team presents Balinese cuisine and healthy natural fare as well as some of the finest international dishes from their buffet or a-la-carte menu. Dining under a thatched roof, or alfresco style, with a soaring view of the dramatic emerald-green infinity pool that floats above the plunging valley, is a romantic experience unique to Alila Ubud.

The option not to leave the retreat at all is very tempting with the art gallery and designer souvenir trading post located right on the premises. Here you can really get closer to the island of the gods, at the centre of its heart, where Alila Ubud offers a combination of culture and comfort with tranquil natural surroundings in the vicinity of the cultural hub of Bali - Ubud. 

MEGABUILD INDONESIA

17th - 20th APRIL 2014 | JAKARTA CONVENTION CENTER

www.megabuild.co.id

RENOVATION & CONSTRUCTION EXPO 2014 NOW is become **MEGABUILD INDONESIA**

MEGA BUILD is the premier event for Indonesia Architecture, Interior Design and Building Industry to congregate, share and experience the latest design trends, solutions, materials, systems and technology. MEGA BUILD will be the perfect platform for you to find business opportunities, expand your market share and penetrate into the growth of Building & Construction sector in Indonesia.

Continuing on the success of the previous editions of Renovation and Construction Expo (RENEX), RENEX is now a part of the mega building event, MEGA BUILD EXPO, the 13th Indonesia dedicated Architecture, Interior Design and Building Exhibition & Conference. This annual event incorporates 6 key exhibitions (KERAMIKA - The World of Ceramics, Renovation & Construction - RENEX, Lighting, Doors & Windows, Roof & Flooring and Bathroom & Kitchen) to cater to the entire building & construction industry showcasing the latest design trends, solutions, materials, systems and technology in the market today.

KERAMIKA 2014
 The World of Ceramics that showcase the local and international ceramic and sanitary ware manufacturers and its supporting industries to one of the largest ceramic consumers in the world - Indonesia.

DOORS & WINDOWS EXPO

Smart Lighting with Smart Phones

Society today constantly seeks ease and comfort in life. Whatever it is, it needs to be presented nicely and easily with great results, especially if it entails the issues of lighting and electricity settings at home. To fulfill this particular need, PT Australindo Graha Nusa has introduced new smart solutions that can easily be implemented at homes, hotels, offices, and another buildings. It's called "AGN Smart Home Solutions".

The AGN Smart Home Solutions boasts advantages such as a wide array of module instruction applications and lighting pattern programming for room settings that can be adjusted throughout the day, including for special ambiances during the evening. At the office the lighting of your meeting room and slide

projector can be turned on simply by using a one-touch panel.

In addition to these features, AGN Smart Home Solutions can also be connected to a movement sensor that is able to detect a room's ambiance and its environment automatically. If, for instance, a room is being used, the lights and other electronic devices within can

be activated in an instant. Furthermore, the system can be connected to CCTV cameras of which one can access or see from the main control panel. This state-of-the-art mechanism can be controlled through smart phones or tablets, especially iPhones and iPads, via the internet. It's truly a convenience. The convenience that the AGN Smart Home Solutions system provides to you is very handy, and it has been used at many homes and world-class buildings, such as The Winsor, The L Hotel Seminyak Bali, Trans Studio Hotel, and if not yet, it can shortly be in your home or office as well.
